Let's talk

We launched the first On-demand check processing platform in 2002 and today offer complete check management utilizing SOA. Contact us for interview requests and information about our products, services, technology and industry views.

About **big changes** and how transmodus is leading the way

By being first to market with a robust solution that lets clients, bank and software partner deliver automated remote deposit with funding, returns handling, recovery and collections all through a single platform utilizing SOA.

Our site and support systems provide all the tools needed to effectively manage and process high volumes of check and ACH transactions. Secure login includes on-demand access and full reporting to manage and deliver the right solutions

Our company and space offers a wide range of core business topics

- How will these changes impacts a small business on main street?
- Does it lower cost for a decentralized enterprise?
- What opportunities does it offer small, regional and top-tier banks?
- Can it help banks increase RDC success?
- How do vertical software providers get in on the opportunity?
- What verticals are best suited to integrate check management?
- What channels are best suited to take such a platform to market?
- What national channels are in place today?
- What does check management encompass from end to end?
- What obstacles get in the way of bring such a platform to market?
- What makes transmodus different or better than competitors?
- What makes the transmodus platform scalable and reliable?
- Is the platform built out or will you add more features or services?

...and many others

The transmodus platform powers the Check Management for Heartland Payment Systems
